

How to Get Reimbursed for OTC Tests Purchased at Eric's RX Shoppe

1. Information:

- a. The test will either be free directly at the point of sale, if your health plan provides for direct coverage, or by reimbursement if you are charged for your test. Be sure to keep your receipt if you need to submit a claim to your insurance company for reimbursement. If your plan has set up a network of preferred providers at which you can obtain a test with no out-of-pocket expense, you can still obtain tests from other retailers outside that network. Insurance companies are required to reimburse you at a rate of up to \$12 per individual test (or the cost of the test, if less than \$12).
 - i. ****Eric's RX Shoppe does not have the ability to bill your test directly to your insurance company. We provide this information and receipt for the patient to submit.

2. Check with your insurance company for a portal or link in which you can submit your receipts for reimbursement:

- a. If you have IBX/Future Scripts: <https://covidtest.optumrx.com/covid-test-reimbursement>
- b. If you have CVS Caremark Pharmacy Benefit: <https://covidtest.optumrx.com/covid-test-reimbursement>
- c. We recommend saving your receipt and box as proof of purchase. Reach out to your insurance plan and ask how you can submit for reimbursement for any test purchased after January 15th, 2022.
